Puzzle one:

The murderer did not have an alliterative name. Hint: alliteration is when two words share the same first SOUND (not necessarily the same letter, like Slippery ceiling).

Puzzle two:

The murderer was not in a cabin number which is a multiple of this number:

I think of a number and multiply it by 7. I add on 19 and then divide by 4 to give an answer of 10. What was my number I started with?

Puzzle three:

All the customers were asked to write a review of Millicent Luxstowe's performance on the opening night. Only a few of the customers bothered to reply... Here are their responses:

Jenny Jones	A bit disappointingly boring - I prefer heavy metal music.
Carwen Carglaze	Not sure – I had my ear plugs in after 30 seconds.
Lianna Botzer	The performance was rowdy, ear-splittingly loud and uncomfortable to watch.
Lennie Levine	Amazing – I'm a big fan. That's why I'm on this trip!
Carla Kerzlake	Revolting performance – way too modern for me.
Gerry Simmonds	Not my style to be honest – I didn't think she was very graceful.
Colin Kerzlake	Her performance was brilliantly funny, but I'm not sure she meant it to be...
Melanie Starr	I hated it. Her singing was quite frankly raucous.
Rita Belamy	Although her singing was a touch discordant at times, on the whole I thought she did well.
Iris Nemo	Why would anyone with such a strident, grating noise coming from her throat think that she had talent?

The murderer did not use an adjective which is a synonym of 'rowdy'. Hint: synonyms are words which have similar meanings. If you're not sure what 'rowdy' means, use a dictionary (either online, on your phone or a paper version)

Puzzle four:

The murderer's age was not a square number.

Puzzle five:

The murderer used a metaphor to describe Millicent. Hint: look at the table of information at the start of the booklet. a metaphor is when writers use language which isn't literally true. They're different from similes as they don't include 'like' or 'as'.

Puzzle six:

The murder victim was found on deck 11 of the cruise ship. To find out her position, you will need to solve the following clues:

Which of the following are **incorrect**? Your answers will reveal the square where Millicent's body was discovered:

A	B	C
$7 + 3 - 2 = 8$	$9 \times 4 + 4 = 40$	$5(2 + 7) = 45$
D	E	F
$8 \times 8 \times 2 = 128$	$3 \times 2 \times 1 \times 0 = 0$	$10 - 3 \times 5 = -5$
G	H	I
$2 \times 5 + 6 \times 7 = 52$	$10(6 - 4) = 20$	$2 + 3 \times 4 = 20$
J	K	
$(63 - 3) \times 2 = 120$	$3 + 4 \times 5 + 6 = 29$	
1	2	3
$4 \times 4 \times 4 = 64$	$12 + 7 \times 6 = 54$	$12 \times 7 + 6 = 90$
4	5	6
$5 + 10 \times 10 = 105$	$10 + 5 \times 10 = 60$	$7 + 6 \times 2 = 26$

Puzzle seven:

Read the following extract from a page of a diary found ripped out and hidden behind the boiler.

I couldn't help it: she made me see red. I'd been chatting to her about what had happened with that customer and she just wouldn't see my point of view. Not everyone is going to like her style of music. Some customers are just not going to appreciate Justin Bieber songs sung to a classical music backing track.

Yesterday, there had been another incident and I was so sympathetic: I'm not sure how much she realises that I was on her side. I listened to her grumbles and made sure she was reassured that everyone still loved her singing and that she would be famous for ever. I don't mind a bit of ego boosting, but it's never returned.

Anyway, things reached crisis point and what happened just got out of hand so quickly. It was just too easy and I didn't think it would actually work – although I can't regret it too much. She'd got too big for her boots and deserved to be taken down a peg or two.

I'll go back and check on her when I've calmed down and she's learned her lesson...

Puzzle eight:

When did the murder take place?

Dinner started at 8.30pm

No one could leave the dinner hall until the Captain had finished eating.

The Captain ate his starter in 14 minutes.

There was a break of 6 minutes in between the starter and main course.

The Captain then had a leisurely main course of haddock and potato cakes served with buttery green beans and a hollandaise sauce. That took him 30 minutes to consume.

The Captain always eats the same dessert every day. Captain Carew loves an Eton Mess. He feels the strawberry sauce balances out the sweetness of the sugary meringues and cream perfectly. He also ordered a coffee to help his food settle before evening rounds. The dessert only took 3 minutes to arrive and 7 minutes to eat. As soon as he had finished, he drank his coffee and left. He took 6 minutes to drink the coffee.

The murder happened 9 minutes after the Captain left the dinner hall.

What time was that?

Puzzle nine:

Compare and contrast the following information about the ship's food. The pair that contains similar information will reveal what the

murderer disguised the poison in, e.g. if there are two similar points about pizzas, then the murderer used a poisoned pizza.
